

DELWORKS VETERINARY DR

Upgrade Package

If you are considering transitioning your practice to digital radiography, consider the *DelWorks Veterinary DR Retrofit Package*, the easy and affordable way to upgrade your existing imaging system to a flat panel (DR) digital system. This upgrade kit includes a Cesium (CsI) flat panel detector that is easy to install and will consistently provide high quality, professional images.

The user-friendly DelWorks Veterinary specific acquisition software is easy to operate and features a wide range of tools for a variety of image manipulations. After exposure, images display in less than 1 second on the TFT color LCD clinical review display with touch screen interface. This DICOM compliant, high definition display provides more accurate grayscales and better contrast than standard monitors.

Automatic image optimization is achieved with the integrated *Advanced Image Processing* software, so you can get the image you need fast to make your diagnosis quickly and efficiently.
